Build Feedback

Hi Emily,

Good start on the site! Most of the content page links aren't working so I will just assume that you will create those similarly to your mockups and to the About page. Here are some notes on the other parts of the page:

- I just want to make sure you are still intending on placing those circles in the background of each page. They're simple but I feel like they really add a lot!
- It would be nice if the HSM 2 box in the navigation bar was a button that linked back to the homepage so the user can go back from any page.
- The footer content is good, I just think it'll look better with a little more margin on top and bottom.
- Also, just keep in mind to check that site is responsive and effective at different sizes.

Feel free to email me if you need anything!
